

LTB Labeling Machine

Application

The labeler applies sticky roller to label on small round bottles. In the process of vertical bottle feeding, labels are torn off consecutively from the labeling roll and stuck on the fixed position of the bottle body. It is a modern machine integrating mechanism and electricity with good and reliable working property.

The label has the advantages of cleaning, non-mouldness, elegance, durableness, and high efficiency. It's widely used in the fields of medicine, food stuff, stationery, cosmetics, light industry, chemical industry, etc. The machine can stick label on all types of circular stuff with great adaptability.

Characteristics

- Driven by bi-motors adjusting speed respectively.
- Controlled by photo-electricity with advanced step motor, it can lock itself and it has the properties of reliable positioning and high sensitivity.
- PLC is from famous domestic supplier. It's easy and prompt to maintain.
- A hot code printer can be equipped based on the requirement and the printing is firm and legible.

Technical Parameter

Model	LTB-A
Production Capacity	60-80 bottle/min(According to the diameter of bottle mouse and the length of label)
Outside Diameter of Bottles	30-120mm
Height	can be customized based on the requirements
Total Power	400W
Voltage	220V 50Hz/60Hz
Overall Dimension(mm)	1600*700*1100m'm
Weight(kg)	145
