

## *HY600S Four Axis Servo Vegetable Packing Machine*

HY600S is a full automatic high-speed and multifunctional vegetable packaging machine developed according to market demand. It is suitable for winter melons, such as long bean potatoes, cabbage, cabbage, cabbage, bean curd, yam, lettuce, lettuce, leek, cabbage, coriander, onion, cabbage, onion, green onion, Shanghai green, celery, konjac, onion, ginger, yam, lotus root, garlic, Zizania, and scallion. The packing of melon, bitter melon, cucumber, cucurbit, pumpkin, eggplant, pepper, tomato and corn type products automatically print the production date.

### **Technical Parameters**

Adjustable range of packaging	L : 150-900 W : 80-230mm; H : 30-150mm。
Packaging speed	10-45 bags / min (different depending on product length and packaging material)
Dimensions	Length 7000mmx width 1003mmx height 1670mm
Belt size	Feed bottom strip length: 5000mm x W 240mm
	Feed side strip (two strips) length: 2600 x width 90mm
	Length of reciprocating middle belt: 1000mmx250mm
	Output belt length: 600X width 250mm
	Depth of feeding bin: 90mm
Belt material thickness	Original imported food grade wear-resistant and easy to clean PU belt, thickness 1.8x1.2
Sheet metal material	SUS304 × 2.0, box 8mm45 +2mmsus304#
Pipe of support frame	SUS304#2.0
Packing line speed	5m (low speed) -15m (high speed) / minute, frequency conversion speed regulation!
Maximum film width of package	680mm
weight	900KG
Power and voltage	220VAC\50Hz 3.0KW
Thickness of packing material	25-60um
