

## ***LTPK LT-320P Automatic Vertical Paste Liquid Bag Packing Machine***

LT-320P piston paste packing machine adopts microcomputer chip control, 5-inch large-screen LCD display, simple and easy-to-use interface, photoelectric eye tracking detection, precise sealing and cutting, optional installation: date printer, exhaust or inflation device.

The packing machine is suitable for automatic packaging of paste and liquid without gas, such as ketchup, sauce, oil and so on.

Auto complete Bag-making, filling, sealing, cutting and counting.

### **Features**

1. Adopt 5-inch color touch screen with beautiful appearance and clear operation interface. PLC control system, the machine runs stably.
2. Can measure the packaging bag, no need for manual measurement, saving adjustment time.
3. With cursor positioning function. Just touch the screen to move the photoelectric eye without manual operation.
4. Adopt special photoelectric capture and rectification technology to improve photoelectric precision. Automatically identify dark and light colors without switching photoelectric eyes.

## Technical Parameters

Model	LT-320P
Voltage	220V/50HZ
Power	1.8KW
Weighing method	Piston
Weigh range	3-30ML/10-100ML
Packing speed	20-40 Bags/min
Bag width	30-140MM( Need to replace the bag maker)
Bag height	40-160MM
Film width	Back sealing: Max 300MM/Three/Four side sealing 280MM
Film thickness	50-80 microns
Film material	Transparent composite film, aluminum composite film
Dimension(L*W*H)	1720*740*1050mm
Weight	280 KG
