

ZF12 Edible Oil Bottle Filling Machine (Oil, Paste, Cream)

If you are in the food processing industry, you know how important it is to have a reliable and efficient filling machine. When it comes to filling edible oil, you need a machine that can handle the high viscosity of the oil and also ensure accuracy and consistency in filling. That's where an edible oil filling machine comes in.

Features of an Edible Oil Filling Machine

An edible oil filling machine typically includes the following features:

1. **High Viscosity Pump:** The pump used in an edible oil filling machine is designed to handle the high viscosity of the oil, ensuring smooth and consistent filling.
2. **Nozzle:** The filling nozzle is usually designed to prevent spillage and drips, ensuring clean and efficient filling.
3. **Filling Speed:** The filling speed of the machine can be adjusted according to the production requirements, ensuring that you can fill a large number of containers in a short amount of time.
4. **Control Panel:** The control panel of the machine allows you to adjust the filling speed, volume, and other parameters to achieve the desired filling accuracy.

Benefits of Using an Edible Oil Filling Machine

Using an edible oil filling machine can offer several benefits, such as:

1. **Increased Productivity:** An edible oil filling machine can fill a large number of containers in a short amount of time, helping to increase productivity and efficiency.
2. **Cost-Effective:** Using an edible oil filling machine can help you save money on labor costs and reduce wastage, as the machine ensures accurate and consistent filling.

3. **Hygienic:** An edible oil filling machine is designed to ensure hygienic filling, reducing the risk of contamination and ensuring the quality of the product.

4. **Customizable:** An edible oil filling machine can be customized according to your specific production requirements, ensuring that you get the best results.

In conclusion, an edible oil filling machine is an essential piece of equipment for any food processing company that deals with edible oils. It is designed to streamline the filling process, ensure accuracy and consistency, and increase productivity and efficiency. So, if you are looking for a reliable and efficient way to fill your edible oil products, consider investing in an edible oil filling machine.

Technical Parameters

Filling Nozzle	12 Nozzles
Filling Volume	200ml-1000ml
Filling Form	Piston Type
Speed	3000BPH(Base on 350ml)
Accuracy	±99%
Material	Rack SUS304 (Material Contact Parts: SUS316)
Air Pressure	0.6-0.8 Mpa
Power	2.8kw/480 V 60Hz 3P
Conveyor Width	152mm
POM Chain Height	900+/-25mm
