

DC-686 High-speed Single-hand Opening/Squeezing Pouch Packaging Machine

The DC-686 is used to produce an innovative single-hand open/squeeze sachet packaging, suitable for food, cosmetics, pharmaceuticals, medical products, chemicals, and other products.

This packaging can be easily opened with one hand, and the product will not be contaminated during opening and squeezing, and all contents can be completely squeezed out. 100% barrier performance ensures a long shelf life for the product.

The machine speed can reach 320 bags/minute (40 times/minute, 8 rows). Size and capacity can also be adjusted and converted.
