

HC-B100 Automatic Weighing and Packing Production Line

Features

1. The use of high-precision and high-speed special measurement and control instrument has the characteristics of strong function, high reliability, flexibility and expansibility, which is completely suitable for repeated and highly continuous production in the production process.
2. It has the functions of automatic correction of drop, automatic alarm of excess error and so on.
3. The machine is a new type of mechatronics equipment, which adopts PLC control and imported high precision weighing sensor.
4. The size of the bag clamp is changeable and can adapt to various sizes of packaging bags.

Technical Parameters

Model	HC-B100
Packing Weight	1kg-50kg
Packing Accuracy	1-20kg, $\leq \pm 0.1-0.2\%$, $> 20\text{kg}, \leq \pm 0.05-0.1\%$
Packing Speed	1.5-6 Time per min
Power Supply	3P AC208-415V 50/60Hz
Air Supply	6kg/cm ² 0.1m ³ /min
Total Power	3.0 Kw
Total Weight	500kg
Over All Dimension	1125 x 975 x 3230mm
Hopper Volume	100L
