

GPK-40D Automatic Cardboard Box Opener

The GPK-40D automatic cardboard box opener is an independent research and development company for product manufacturing and design. The pneumatic vertical case opener has a opening speed of up to 12 cases per minute, with the same level of vertical case opener at a 50% lower price.

Application Industry: The opener has been widely used in the food, medicine, beverage, tobacco, daily chemical, electronic, and other industries.

Features

1. Imported parts Use durable parts, electrical components, and pneumatic components.
2. Can be used in combination Can be used offline or in combination with automated packaging lines.
3. Save working time Vertical storage of the cardboard path, and can be replenished at any time cardboard cardboard, without stopping.
4. Labor savings the packaging operation is performed by a machine instead of labor.
5. Improved efficiency: Rationalization of the bottom sealing machine design, synchronous suction molding, bottom folding, and bottom sealing at the same time, synchronous molding, stable opening speed, and higher efficiency.
6. A safer installation of a transparent plexiglass protective cover, which automatically stops when the door is opened to prevent accidents during operation.

Technical Parameter

Title	Parameter
Box Range	L:450~250mm×W:400~150mm×H:400~100mm
Speed	10-12 boxes/min
Voltage	110/220V, 50/60Hz, 1 Phase
Power	200W
Compressed air	0.6Mpa
Tape Size	48、 60、 72mm
Machine size	Length : 2000mm Width : 1900mm Height : 1452mm
Weight	350Kg
