

DPP-250DI Alu/PVC Blister Packing Machine

This machine can continually and automatically complete the packing proceedings, is blister cap form-taking, medicine-feeding, heat sealing, printing lot no, and cutting into format. It Has advantage as compact structure, full function, gear wheel working, and accurate Synchronization, stable cooperation, easy to replace the mould, low cost and needn't to equip Auxiliary unit. Turn on power and connect it with cooling water, you can produce in a large scale.

The machine is widely used in the vocation of medicine, foodstuff, and electron, hardware for Alu/PVC blister packing of various objects, such as capsule, tablet, pill and electronic Part.

Features:

- Compact and simple structure
- Stainless steel construction
- Platen sealing
- Automatic rejection of blister
- Meet GMP standard
- CE certificate
- Procedure:
- Forming film of reel support with automatic unwinding system
- Paten heating system
- Compressed air forming station
- Automatic filling device
- Cover foil reel support with automatic unwinding system cover foil unwinding system
- Guide rails
- Sealing station
- Punching station
- Waste winding unit

Technical Parameters:

Item/model	DPP-250DI
Capacity	4800-12000 plates/hour
Punching frequency	20-50 times/min
Maximum forming area and depth	250 x 120 x 20 mm
Adjustable scope of travel	30 - 120 mm
Packing material	PVC: 250 x 0.25(0.15-0.5) mm
	PTP aluminum foil: 250 x 0.02 mm
Power	5.7 KW
Power supply	AC, 380V/50 HZ, 3 phase
Air compressor	≥0.22 M3/min (provide for oneself)
Air pressure	0.5 - 0.7 MPa
Overall size	3800(L) x 800(W) x 1800(H) mm
Weight	1500 kg
