

KYV-5P Semi-auto Granule Vacuum Packing Machine

This machine consists of one set linear weigher for weighing and filling, one set vacuum packaging machine, one set take-off conveyor, manual put the bag on weighing machine discharge mouth, the weigher automatically weighing and filling, then manual put the bag on vacuum device for automatically vacuum and sealing. It is suitable for granules, such as: rice, miscellaneous grains, beans, cashew nuts, etc.

Technical parameter:

| Model | KYV-5P |
|-------------------------|--|
| Packing range | 2.5~5kg |
| Packing speed | 480-600 bags/hour |
| Packaging error | X(0.2) |
| Power consumption | AC380V 50HZ 5KW |
| Gas source requirements | 0.4-0.8Mpa 1m3/h |
| Appearance size | length 18600*width 1450*height 2100 (mm) |
| Vacuum degree (MPa) | -0.07-0 (adjustable) |
