

## *De-burrer and De-duster Machine*

Deburrer plays very significant role in manufacturing business performing past production inspection for checking accuracy of the product. Deburrer examines the finished product for quality, specifications and checks for safety, Deburrer Machine also known as Deburring Machine

De Duster can also be termed as Dust Controller or Dust Separator. It removes dust and streamers from raw material before entering production vessel. It is mostly useful in pharmaceutical industry, fertilizer industry and cosmetic industry. Deduster Machine also known as Dedusting Machine

### **Technical Specification**

<b>Output ( for 8mm tablet)</b>	350,000 tablets / hour
<b>Power Supply</b>	0.25 HP, 1440 rpm, 440 v, 50 Hz, 3 phase
<b>Max Tablet Dia</b>	40 mm
<b>Minimum Tablet Dia</b>	5 mm
<b>Overall Dimensions (mm)</b>	400 (d) x 400 (w) x 800 (h)
