

MIC-ZF4 Bean Oil Filling Machine

The Bean Oil Filling Machine stands out with exceptional characteristics meticulously engineered for efficiency and accuracy. Crafted from high-quality materials, often stainless steel, it ensures durability while adhering to the stringent hygiene standards for food-grade applications. Featuring automated bottle feeding, precise filling, and capping mechanisms, the machine epitomizes a harmonious blend of speed and accuracy in bean oil production. User-friendly interfaces equipped with programmable controls accommodate various bottle sizes and bean oil viscosities, ensuring each product receives a consistent and precise fill. Anti-drip features and customizable settings preserve the quality of bean oil formulations, delivering products that resonate with both efficiency and the promise of superior taste.

Product Applications:

The applications of the Bean Oil Filling Machine span the entire spectrum of bean oil manufacturing, providing a comprehensive solution for efficient and automated filling. Whether producing standard cooking oils, specialty bean oils, or unique blends, this machine ensures uniformity in dosage and presentation. Its adaptability caters to the dynamic requirements of the food industry, where each bean oil variant requires a tailored approach to dispensing, capping, and preserving its unique flavor profile.

Parameter

Model	MIC-ZF4	MIC-ZF6	MIC-ZF8
Application	pesticides, chemical, cosmetic and other corrosive, High Viscosity Materials, Liquid soap, oil product ,Lotion And So On		
Packing Type	Metal Cans, jar, Glass Bottle, Bag, Plastic Bottle Etc		
Speed	2000B/h	2500B/h	3000 B/h
(basis on 50-500ml)			
Filling Arrange	10-20ML. 25-250ML. 50-1000ml, 50-500ML.100-1000ML.250-2500ML. 1000-5000ML 100ml-5L.(10ml-5l)		
Power	3.5Kw	3.6kw	3.7kw
Size	1400*1450*2270	1400*1450*2270	1700*1450*2270
	mm	mm	mm
Weight	500kg	600kg	700kg
