

YNJX-F Semi Auto Spice Powder Packing Machine

This semi auto spice powder packing machine is used for packing pesticides, veterinary drugs, premixes, additives, milk powder, starch, seasonings, enzyme preparations, fodder and other powder-like quantitative packing.

Products Description

1. Screw feeding and electron measure technique
2. Computer control
3. Automatic quantitative, filling, correct error, counting and so on.
4. Suitable for pesticide, veterinary drug, additive, flour, milk powder, solid drinking, white sugar, spices etc

Features

1. semi auto spice powder packing machine is mechanical, electrical, optical, instrument in whole one, single-chip control, with functions of automatic quantitative, automatic filling, automatic adjustment of measurement errors.
2. Photoelectric switch control, only need manual setting bags.
3. The error caused by the proportion of materials and materials level changed can be automatically tracked.
4. The packing range is 5-5000g different filling weight range, need different screw, this make sure the packing accuracy and speed
5. The material contact parts are made of stainless steel production, easy to clean to prevent cross-contamination. You can match with powder hopper loader machine, for uses more easier for users

Technical parameter

Model	YNJX-F semi auto spice powder packing machine
Voltage	AC380V
Power	750w
Packaging Accuracy	±1%
Packing specification	5g-5000g
Packing speed	1500-4200 bags/h
	360-720bag/hour (more then 2kg)
Size	1100*700*1950mm
Weight	250 kg
