

Semi-automatic 4 Heads Wine Soft Drinks Beverage Soymilk Overflow Siphon Filling Machine

This machine is suitable for liquid filling of plastic, glass, porcelain and other special-shaped bottles. Manually feed bottles and take bottles. According to the principle of constant liquid level filling, it can ensure that the liquid level in the bottle after filling is neat and consistent, and improve the production quality. The feeding system of this machine adopts electronic float sensor to control the liquid level. When the lower limit position is reached, the feeding pump starts to feed filling material. When the upper limit position is reached, the material pump stops feeding.

Main Feature

- ▶Based on siphon principle, it is good for filling foamy liquid.
- ▶Can feed filling material automatically.

Parameter

- Power: 0.37KW
- Working capacity: About 500-1000 bottles/hour
- Bottle height: 160-350mm (can be customized)
- Bottle diameter: OD 60-100mm(can be customized)
- Bottle mouth: ID≥16mm
- Filling accuracy: About 99.7%
- Machine size (L×W×H): About 610*550*1050mm
- Machine weight: About 45kg
- Package size: About 830*730*1250mm
- Package weight: About 63kg
