

YLF-1 Automatic Turntable Plastic Cup Filling and Sealing Machine

The Turntable Plastic Cup Filling & Sealing Machine is an automatic pneumatic-driven system crafted for high-efficiency packaging in food, beverage, chemical, and commodity industries. Built with 304 stainless steel, PLC control, and a large 40 L hopper, it supports flexible filling ranges (10-50 ml / 30-250 ml / 50-500 ml) and operates at speeds up to 500-1500 cups per hour. This machine is designed for use with PP and PET plastic cups and bottles, delivering secure, hygienic sealing and consistent performance. With a compact footprint of 1200 × 1100 × 1850 mm, a 1-year warranty and options for customization, it's an ideal solution for factories and beverage shops looking to enhance productivity and maintain packaging quality.

Technical Parameters

Specification	YLF-1(1CUP/TIME)	YLF-2(2CUPS/TIME)
Power	1KW	1.5KW
Speed	500-1500cups/H	1000-3000cups/H
Filling range	10-50ml, 30-250ml, 50-500ml	
Mold	Can be customized (Can quickly replace molds)	
Hopper capacity	40L	
Power Supply	50HZ 220V	
Machine Size(mm)	1200*1100*1850	1600*1400*1850
