

SED-6/6GX Pharmacy Herbal Capsule Auto Liquid Filling Machine

The series injection type/normal pressure gravity type dual-use filling machine is a high-tech product researched and developed by our company. It is suitable for products of various viscosity such as water injection, semifluid and ointment etc.

It is widely applied for filling of products in such industries as food, cosmetics, medicine, grease, daily chemical industry, detergent, pesticide and chemical industry etc. By adopting straight line filling mode, it can be used to fill solutions of different types without the need of adding any spare parts.

Feature

The series machine is compact and reasonable in design and beautiful and decent in appearance. Formulated with select international brand electrical components. Active force cylinder selection AirTAC (AIRTAC) double acting cylinder and magnetic switch.

Taiwan Delta PLC computer company, Omron photoelectric, Taiwan PVA production touchscreen, ensuring its outstanding quality and long-lasting stable performance; The machine can be maintained conveniently. It can be easily assembled, disassembled and cleaned without any tools.

The adjustment is convenient. For the measurement adjustment, firstly adjust at large scale to be close to the measurement and then carry out fine adjustment. It can be realized that no filling in case of no bottle or insufficient bottle and accurate measurement.

The filling system of the machine adopts ferrule type rapid installation sanitary connector. The whole cylinder can be easily assembled, disassembled and cleaned from top to bottom without any tools. The structure is simple in design and convenient in operation and maintenance.

Product Description

Model No.	SED-6/6GX
Filling speed	40-50 bottles per minute(250ml)
Filling precision	±1%
Cylinder specification	25-250ml,50-500ml,100-1000ml,250-2500ml
Working pressure	5-7kgs/m ²
N.W	950KGS
Dimension	3000*810*2200mm
