

ML-HS series Fully Automatic Linear Piston Filling Machine

This series of injection/atmospheric pressure gravity dual-use filling machines is a high-tech product developed by our company. It can be applied to water agents, semi fluids, and paste products of different viscosities, and is widely used for product filling in various industries such as food, cosmetics, pharmaceuticals, oils, daily chemicals, detergents, pesticides, and chemicals. Adopting a linear filling method, it can be used for filling different types of solutions. No need to add any spare parts.

Technical Parameters

主要技术参数 Main Technical parameters	
型号Type	LM-HS系列（6头、8头、10头） LM-HS Series (6 heans、8heads、10heads)
灌装速度Filling Speed	80-100瓶/分钟（指250ml/10头）
灌装精度Filling Precision	± 1%
缸体规格Cylinder Specification	有25-250ml、50-500ml、100-1000ml、250-25000四种
工作气压Working Pressure	5-7kg/m²
机器净重Net Weight	950kg
外形尺寸Dimension	2000×810×2200mm
