

Automatic Horizontal Labeling Machine Model SBM-L21900

Automatic horizontal labeling machine is suitable for small round bottle which can't stand steadily, horizontal transmission, horizontal labeling, can improve stability and label efficiency. Can select code printer or inkjet coder to labeling head to realize print product's date, system number, inkjet bar code and other information. Can select code printer or inkjet coder to conveyor line to realize print product's date, system number, inkjet bar code and other information. It is also suitable for assembly line.

Features

1. High speed, adopt roller transmission sideling conveyor, bottles be putted on the right place automatically, labeling steadily, speed can catch to 400pcs/min. Saving large labor and material.
2. High quality labeling, correct label belt be in right position, label cover label accurate, rolling and nobbing press label result in an even, no scrape, no air bubble on ever product. Improve packing quality.
3. High stability Panasonic PLC + KUNLUN TONGTAI Screen + Panasonic needle electronic eye + Leuze label testing electronic eye as the high grade electronic control, support equipment working at 7*24hours;
4. Intelligent control, Automatic photoelectric tracing, no label for when product didn't come, automatic correct, automatic testing, can avoid leaking and wasting.

Technical Info

Model	SBM-L21900
Labeling Speed	up to 300 bottles per minute
Labeling Accuracy	±1mm
Product Range	diameterφ18mm~φ21mm,height25mm~100mm/td>
Label Size	(bottom) Width20~150mm,Length20~100mm
Power supply	AC220V/50Hz AC380V/50Hz Optional
Workable Height	470-780mm
Air Pressure	5-6kg/cm
Dimension(L×W×H)	2020×650×1450mm
Machine Weight	Approx.200kg
