

## High Speed Capping Machine SXGJ130

SXGJ130 high speed rubbing machine is adapted to cap various kinds of bottles (round, oblate and square bottles). It is widely used in medical, healthy, food chemical and pesticide industries.

- Cap lifting machine
- Rotary cap sorting machine
- Cap lifting track
- Host (included bottle delivery and cap locking parts)
- Conveyor belt

You can choose the bottle testing machine (this is not suitable for the easy-broken one). The high speed capping machine can work alone, and you can also choose the other matching machines to form a production line.

### Technical Parameters:

Voltage	380V,50HZ
Power	1.2KW
Production capacity	100-200 pcs/min
Size	2000*850*1650mm
Net Weight	600kg
Capping rate	99%
Stopper rate	99%
