

## GB-20 Wrap Around Case Packer

GB series includes automatic machines for the packaging of pvc bottle, pet bottle, glass bottle, paper and box in corrugated cardboard cases and/or trays without film which widely used in food, toy, chemical, cosmetic, medical and plastic industries. Wrap around case packers can achieve an output up to 20 packs per minute, according to the product. The packing arrangement can vary according to the containers shape and dimensions; in general, the most requested arrangement are: 2x3, 3x4 and 4x6.

### Features:

1. Man-machine interface screen control.
2. Automatic error message display provides convenient shooting trouble.
3. It adopts detecting switch and mutually connected device, which can detect and adjust the operation condition automatically during the whole production line.
4. It can operate with fully wrap around carton packing and tray packing.
5. Parameters can be set and modified on touch screen.
6. Scale provided for machine adjustment permits recording and convenience for adjustment.

Model		GB-20
Capacity	case/min	15-20
Air Consumption	nl/min	150
Production Efficiency		≥98%
Packing Arrangement		According to customer requirements
Voltage	V	380
Air Pressure	Kg/cm <sup>2</sup>	6
Power	kw	8
Machine Dimension	mm	6070*2800*2006
