

# CMS SERIES

## CONTINUOUS MOTION SEALBAR MACHINE

Polypack's CMS series machines are inline shrink wrappers running in continuous motion, designed to provide a bullseye wrap to products longer than 4 inches. These machines have belt-to-belt transfers, controlled by motor inverters for positive transfers. The CMS series shrink bundling machine can be installed at the end of a tray multipacker to shrink wrap each tray after they are formed and loaded.

**POLYPACK'S CMS SERIES** machines are available as stand-alone systems that can either be handloaded or fed by an existing conveyor. The CMS series machines are also available with a wide array of product collation modules as well as a pad feeder to create pad-supported shrink multipacks.

## CMS SERIES MACHINE FEATURES

- \*Heavy Gauge, Stainless Steel Main Frame
- \*Self-Leveling, Teflon<sup>®</sup> Coated Hot Knife Sealbar Assembly
- \*Pre-Programmed Acceleration and Deceleration for Smooth Operation
- \*Self-Adjusting Solid Stainless Steel Rod Tunnel Conveyor (No Belts or Coatings)
- \*Low-Level, Side-Mounted Film Positioning for Quick and Easy Threading
- \*Engineered as an Single Unit with Integrated Double Insulated Tunnel to Reduce Energy Consumption
- \*Polycarbonate Enclosures Ensure Safety and Easy Access to Machine Components
- \*Quick Changeovers
- \*PLC Touchscreen Interface
