

KZG Series Capping Machine

This machine is suitable for capping for vial.

Performance and characteristics:

This machine can complete the following procedures automatically: bottle-infeeding, cap-handling, cap-infeeding, capping, bottle-outfeeding and it adopts single knife capping which is popular in the world and flexible rolling-on sealing, vertical oscillating feeding knife technology which is obtained multiple patent. This machine is characterized by no broken bottle, good capping, humanization, easy operation.

Technical Parameters:

Model	Production capacity	Capping head	Electric capacity	Net weight	Overall dimension
KZG16	100-400pcs/min	16	2kw	1000kg	2200*1032*1450mm
KZG18	200-450pcs/min	18	2kw	1200kg	1180*900*1600mm

Remarks: It is suitable for vial from 1-30ml. The production capacity depends on the bottle and aluminum cap size. Normally, the smaller size, the higher capacity. The detailed information should depend on parameter of instruction manual.
