

Auto Pharmaceutical Blister Packaging Machines Tropical Type DPP-250F

The plat type blister packing machine carries on to the drugs (troche, capsule) food, the medical treatment apparatus and its similar material. As the packing equipment of the blister type aluminum (PVP)/ plaster (PVC) has taken pressure forming, heat-sealing, so the product come out smoothly and solid.

DPP-250F packing machine, our third generation, based on type DPP-250F, F1, F2 adopts frequency conversion to adjust the speed and automatic control technique and innovate and design to the standard "GMP ". It has many functions such as, adjustable stroke, partial, combination, three uses "AL/PL--AL/AL--AL/PL/AL", the capsule turned head arranges to color. The technique fills up the local blank, its comprehensiveness stands for the leader and more active than the imports.

Technical Parameter:

Capacity (punch/time)	20-40
Range of stroke (mm)	40-120
Packing material:Pharmacy PVC (mm)	(0.2-0.5)*250
PTP alu foil (mm)	(0.02-0.05)*250
Tropical alu (mm)	(0.09-0.15)*250
Cleam compressed air	0.5-0.7Mpa
Air consumption (m ³ /min)	≥0.3
Power	AC380V 50HZ 12KW
Water chiller for moulds	Tap water or recycle water with 60L/h
Dimension (L-W*H)(mm)	4890*650*1700
Net weight (kg)	2600
