

Automatic Vertical Carton Erector Machine KLJ-40D

MAJOR CHARACTERISTICS

1. This machine can complete the work of carton opening, folding and sticking the adhesive tape.
2. Adopts PLC+ touch screen control.
3. Imported components, electric and pneumatic parts.
4. Vertical cardboard magazine, add cardboards whenever necessary without stopping the machine.
5. Manually adjust for different cartons within allowable range, just takes 1~2 minutes.
6. Reasonable design, vacuum cup suck the cardboard, fold and seal the bottom.
7. Small space occupation, precision and durable parts provide the guarantee for stable running, long life, and high efficiency.
8. With protection device for cutter installation to avoid being hurt.
9. Easy operation, machine can be used individually and combined with the packaging line.

TECHNICAL PARAMETERS:

Items	Performance
Carton Size	L:200-450 W:150-400 H:100-350mm
Speed	8-12 carton/min (according to the carton size)
Dimension	L2000*W1900*H1450mm
Power supply	220V/380V 50/60HZ 300W
Table Height	Min 600mm; Max 720mm
Tape width	48/60mm
Air source	5-6kg/cm ³
Tape	48/60/72mm
Weight	400kg
