

Electromagnetic Induction Aluminum Foil Sealer LB-6000A

MAJOR CHARACTERISTICS

This machine is specially designed for the lubricant industry. It combines the advantages of various sealing machines and can perfectly seal the bottles diameter of 10 mm to 200 mm. Also some irregular bottles. So it will bring the biggest economic benefit for the customer.

1. The sensing head with tunnel structure, unique multi-dimensional stereoscopic heating mode can seal efficiently.
2. Without preheating, simple operation and convenient maintenance.
3. High quality stainless steel manufacturing, product design is reasonable, beautiful and easy, in line with the GMP requirements.
4. Host machine use the latest imported transistor, the CPU control and adjustable power.
5. Special switching power supply ensures the constant power output.
6. The water-cooled continuous work, efficient and high speed, can be the whole day running;
7. Convenient and flexible with production line.

TECHNICAL PARAMETERS:

Item	Performance
Sealing range	ϕ 10-80mm 80-200mm
Power supply	AC220V \pm 10% 50HZ
Power	4000w (max)
Production capacity	400bottles/min (take PE the bottle diameter is 30mm for example)
Dimension	600*600*1300mm
Weight	95kg
