

Paste Filling Machine

Our paste filling systems are designed to meet the demands of the Paste industry as well as other industries.

Key Points of paste filling machine:

- Vibration less operation
- Longer service life
- Smooth functionality
- Easy to operate
- Simple and compact in design.
- No Bottle – No filling systems.
- Highly accurate filling machine
- All product contact parts are made up of stainless steel material.
- Complete stainless covering.
- Turn table (optional)

Technical Parameters:

Machine Dimension	800x1500x1850
Machine Head	Upto 24 Heads
Machine weight	300kg
Power Requirement	5kw
Air requirement	6kg
Filling volume	5gm to 1000gm with the help of change parts
Machine construction	SS304
Filling Construction	SS316
Machine Speed	Upto 240 jars/minute (Depend Upon Filling Material)
