

## *Table Type Small Circular Bottle Labeling Machine XQTB-80R*

### **Application:**

1. It is widely used in precision, quantitative loading / dilution of pharmaceutical, pharmaceutical, food, chemical, cosmetic and other industries.
2. Pre-chromatography preparation, pharmaceutical QC and R&D, environmental monitoring, mineral and blood analysis, forensic identification.
3. Used for precise quantitative loading / dilution of blood, biological reagents, oral agents, injections, advanced cosmetics, flavors, fungicides and other liquids.

### **Characteristic:**

1. It is compact and easy for carrying. Labeling height and angle can be adjusted easily.
2. Wrap station helps to paste label well. And conveyor belt speed and labeling speed can be controlled.
3. High quality sensor detecting system helps to paste label better. Operation control is simple by using microprocessor and LED screen.
4. Size of bottle can be changed without controlling position and timing. Labeling speed is linked with conveyor belt speed.
5. Emergency stop button is installed for safe operation.
6. Stainless steel and high quality aluminum alloy are used.

### **Technical parameters**

Model	XQTB-80R
Bottle size	Φ20-50mm
Labeling speed	100ppm
Inner diameter of label roll	Φ75mm
Pastes the sign precision	±0.8mm
Size of Host Machine	150×88×66cm
Power supply	AC220V 50/60Hz 750W
