

GOLDEN LIN

Automatic Auger Powder Filling Machine GL-1340

Features:

1. High Precision load cell type weighting unit
2. Equipped with weight micro-processor, permitting 2-step setting for various weights
3. Employs frequency inverter micro-processor, providing high/low speed setting as desired
4. Magnetic clutch brake system provides for machine stop and start control
5. Servo motor system
6. PLC control + touch screen system

Applications:

Suitable for bottle powder filling, such as for food, medicine, herbs, chemicals, and pesticides, etc.

And for non-free flowing powders with 35-65 degrees of repose or allowable brakage of particles.

Specifications:

| | |
|---------------------|-------------------------|
| Filling Speed : | 20 bottles/ per minutes |
| Powder Source : | 220/380V, 60Hz, 3 phase |
| Power Consumption : | 1.5KW |
