BT Automatic Bottle Collector

Put the bottles (plastic bottles, glass bottles) on the rotating disc manually, and then it will set the bottles into conveyor in orderly. This bottle collector turntable can use for bottles pre-loading, save labor, could be as bottles input, output. It's widely used for food/commodity/health care products/pharmaceutical industries.

- All-in one versatility: different table diameters with variable speed control.
- AC varibale speed drive: speed can be adjusted precisely.

Parameters:
