

## ***BGB-5H Lab Tablet Coating Machine (coating pan interchangeable)***

BGB-5H coating pan interchangeable coating machine is a kind of excellent laboratory equipment which is used for film coating, This equipment is manufactured according to the requirements of GMP standard. With three interchangeable coating pans, make it more versatile and powerful for laboratory purpose.

### **Features:**

1. All in one design. hot-air inlet, coating and hot air exhaust are all in one machine.
2. Control and display the negative pressure of coating pan
3. Display the differential pressure of HEPA filter in supply air
4. Control and display the temperature
5. Control and adjust the atomization covered area.
6. Program control of spray gun and atomization
7. Design of gun clearing and anti-block
8. With the functions of memory and printing
9. With the function of interchangeable coating pan
10. With the functions of impulse and de-dusting.

**Technical Specifications:**

<b>Model</b>	<b>BGB-5H</b>
Coating Pan Diameter (mm)	300,380,480
Production Capacity (kg/batch)	1, 3,5
Rotating Speed Of Coating Pan(rpm)	6-30
Motor Power Of Main Machine (kw)	0.37
Temperature Range Of Hot Air	From normal environmental temperature to
	80 centigarde
Filtration Accuracy Of Hot air (um)	0.5
Power Of Hot Air Motor (kw)	0.25
Power of Exhaust Motor (kw)	0.37
Power Of Electric Heating (kw)	6
Power Of Peristaltic Pump (kw)	0.03
Dimension Of Main Machine (mm)	1250x900x1680
Weight (kgs)	400
