

Food Grade Powder Mixer TH-SMJ-300

The food grade powder mixer is suitable for powder and powder, granule and powder to mixing. It is widely applied in mixing food industry item powder like coffee powder, dry powder milk, food additive powder etc. It consists of U-shaped horizontal mixing tank and ribbon blenders inside it. This machine will be mixing powder within 10-15minutes.

Widely used in chemicals, medicine, compound fertilizer, dyes, pigments, rubber, building materials, food, milk powder, health products, feed, additives, aquaculture, bioengineering, fine chemicals, ceramics, refractory materials, rare earths, plastic glass, New materials, nuclear materials and other industries.

1. The food grade powder mixer machine with appearance beautiful, well-made, reasonable and simply design for construct, safe and reliable use.
2. Small gap between paddle and tank bottom, not crush hurt to material and easy to clean.
3. Food contact parts are made of advanced non-toxic, we adopt SUS304 with food safety grade.
4. The food grade powder mixer is characterize by high efficiency and high quality and output capacity each day. We offer customized machine with best price.
5. The mixing blender is with double layer design, it will be much better mixing effective.

Machine parameter:

Machine model	TH-SMJ-300
Machine material	SUS304
Power supply	4kw AC380V
Working capacity	480 liters
Size	2.32m*0.85m*1.78m
Weight	320kgs
