

XHL-FL Air Cooling Aluminum Foil Sealing Machine

Utilizing electromagnetic principle , high frequency signal after amplifying output through interaction coil , as the container with compound aluminum tinsel in inner cap pass through the interaction coil , immediately generate eddy current heat , make the aluminum tinsel side glue closely with bottle mouth , reach the purpose of airtight sealing.

Suiting for the sealing of container of medicine foodstuff, cosmetics, pesticide, lubricating oil, chemical product etc. playing a role of sealing airtight, anti-theft, counterfeit and so on. It can be used in the aluminum tinsel sealing of PE, PET, PP, glass etc non-metal material containers.

Technical Parameter

ITEMS	FL-2000	FL-4000	FL-4000B
Seal diameter:	10-80mm	10-80mm	10-120mm
Sealing speed:	100-200BPM	200-350BPM	200-300BPM
Frequency:	80KHz	80KHz	100KHz
Cooling system:	Air cooling		
DOS Shell defending grade:	IP21		
Power supply:	220V 50/60Hz		
Max. output	2 kw	4 kw	4 kw
Net weight:	80 kg	90 kg	100 kg
Overall dimension(mm):	600*420*1050	600*420*1100	600*500*1200
