

2 / 4 / 6 Heads Automatic Vacuum Capping Machine

Automatic vacuum capping machine for food sauce jars glass containers bottles with two heads four heads size head choose.

It applies to screwing for vacuum sealing of glass bottle products such as seasoning, pickles, fermented bean curd, jam, sauce, chili food, apple jam etc.

Automatic vacuum capping machine for food sauce jars glass containers bottles is mainly appropriate to seal plastic bottles and glass bottles with advanced product design, reasonable structure and easy and simple operation. It is necessary and ideal packaging equipment of food and other industries.

Automatic vacuum capping machine for food sauce jars glass containers bottles conforms to regulations of national standards, departmental standards and enterprise standards and can be allowed to leave the factory after qualification of strict inspection and test.

Technical Parameters:

- Material: Outer body 304# stainless steel.
- Cover arrangement method: ladder belt lifting mechanism cover
- Suitable bottle specifications: according to the sample provided by the customer
- Lower cover form: mechanical lower cover can be added
- Screw cap form: vacuum seal screw cap
- Speed: 1500-2000 bottles/hour
- Material: stainless steel frame
- Program control: frequency converter speed regulation
- Conveyor belt: 82mm or 114mm wide stainless steel chain belt, speed 0-15m/min, height above ground 750mm±25mm
- Power of the whole machine: about 0.6KW
- Air pressure: 0.6-0.8MPa
