

NJP-S Semi-automatic Capsule Filling Machine

NJP-S semi-automatic capsule filling machine is suitable for filling various domestic or imported capsules. This machine adopts electrical, pneumatic joint control, and is equipped with an electronic automatic counting device, which can automatically complete the actions of capsule positioning, separation, filling, and locking, Reduce labor intensity, improve production efficiency, and meet pharmaceutical hygiene requirements.

The machine is sensitive and reliable, with accurate filling dosage, novel structure, beautiful appearance and convenient operation. It is the ideal equipment for filling capsule medicines in the pharmaceutical industry.

Technical Data:

Capacity	1-2Capsules/minute.
Suitable Capsule Size	00#-4#
Power Supply	380v 50Hz 2.2kW
Machine Weight	330kg
Machine Dimensions	1290*685*1600mm
