

Картонажная машина ZH60

The Horizontal Intermittent Motion Cartoner is specifically designed for small batch production. This machine is suitable for use in pharmaceutical, cosmetic, food and consumer products industries.

It is used for cartoning tubes, ampoules, vials, blisters, bottles or any other product that goes into a unit carton.

The leaflet should be pre-folded before loading in the leaflets magazine.

Its compact design provides an extremely space-saving solution.

Main Technical Parameters:

Max.Output:	60 cartons/min.
Range of Carton Size:	Max.160x90x55mm Min.60x30x12mm
Machine Power:	0.85kw
Machine Dimension:	1200x1000x1600mm
Machine Weight:	1000kg
