

## *GSL Automatic Silicone Lipstick Producing Equipment*

### **Application**

It is specially designed for silicone mold lipstick, shapes of lipstick is flexible, and high viscosity materials which including glitters and pearl powder is available to fill. Filled surface is evenly and without joint line.

### **Features**

- Heating tank in 20L, made by SUS304.
- Easily operating and parameters is setting on touch screen.
- Yield rate is higher to reduce production cost.

### **Technical Parameters**

Voltage	AC380V (220V), 3P, 50/60HZ
Air Pressure	4-7 kgs/cm <sup>2</sup>
Outer Dimension	515*144*180 cm
Output	30-35 pcs/min (acc. to different process)
