

Disinfectant Filling Machine

The disinfectant filling machine produced by Planet Machinery is a kind of filling equipment which is controlled by PLC and controlled by photoelectric sensor. This disinfectant filling equipment is mainly used for the filling of sanitizer liquid, disinfectant liquid, hand sanitizer, pharmaceutical alcohol.

This disinfectant filling production line is convenient and fast to maintain and clean. The disinfectant filling equipment is made of high quality stainless steel. The filling head uses PP anticorrosive filling valve and self-flow filling method.

Features:

1. This disinfectant filling line is suitable for packaging strong acid and alkali liquids.
2. Using PLC and touch screen control, simple operation, accurate and convenient measurement adjustment.
3. The disinfectant filling production line complies with GMP standards.
4. Use parts of internationally renowned brands, which are safe and reliable, and have a long service life.

Technical Parameters:

Filling Head	Suitable bottles	Capacity(bottle/hour)	Precise	Size of Machine(mm)
20	height : 100-280mm	4500-5000	≤1000ml: ±2ml	2400*1100*2200
16		4000-4500	100-500: ±1ml	2000*1100*2200
12		3000-3500		2000*1100*2200
10	diameter : φ30- 110mm	2000-2500	≤100ml: ≤1ml	1800*1100*2200
8		1500-2000		1800*1100*2200
6		1000-1500		1600*1100*2200

Filling Head	Power(kW)	Power source	Air source	Note
20	2.5kw	220/380V	0.6MPa	Can be customized
16	2.5kw			
12	2kw			
10	2kw	50/60Hz		
8	2kw			
6	1.5kw
