

GCS24/10 *filling and capping machine*

Main Application:

The machine used for washing large fine after the infusion bottle filling ,stopping.

Main Technique Parameters:

- ◆production standard:100ml-500ml
- ◆quantity of filling : 24
- ◆quantity of capping :10
- ◆capacity : 100ml-500ml
- ◆production ability:100-200 bottles/min
- ◆weight: 2500kg
- ◆overall size : 1600*1350*1800

Function Features:

- ◆Adopts diaphragms valve that produced by GEMU ,can realize no bottle no filling.
- ◆Adopts the advanced filling , accurate measure , no mechanical friction part , demands the GMP.
- ◆More suitable specifications , and the size changing is convenient and easy .
- ◆Adopts frequency conversion and PLC control , moing reliably , running easily .
- ◆It can realize CIP/SIP .
- ◆The tube and valve of contraction medicine liquid used 316L or silica gel , other surface material used 316L .Control elements , pneumatic elements and hydraulic pressure elements are all selected international well-know brands.
