

## *Automatic Sleeve Labeling Machine SLM-100*

### Automatic Sleeve Shrinking Labeling Machine

Capacity: 6000 bottles per hour  
Power & Voltage: 7.5Kw 380V 3phases  
Bottle dimension: Suitable 0.5L and 1.5L  
Label material: PVC/PET/OPS  
PLC Control: Label roller system  
Label cutting system  
Label shooting system  
Label fixing system

### **Main Features:**

1. Single driving design ensures mandrel keeping its proper position during feeding. This will offer stable label feeding performance.
2. Compact adjustable high-speed sensor keeps accurate label inserting position.
3. Optional equipments and accessories for customer to choose. Saving unnecessary expenses.
4. Knife plate and mandrel can be easily changed within few minutes.
5. Equipped with a touch screen for user friendly operations. Safety guard provides added safety.
6. Accommodates film paper core sizes of 5"-10" with variable adjustments.
7. Powered elevation design. Ruggedly constructed throughout, the machine is suitable for various bottle shapes.
8. The machine employs well known parts for long service life, easy availability, time saving maintenance, and no affecting of production efficiency.
9. Integrated adjustments for the entire transmission mechanism gives maximum convenience for label specification variation.
10. Specially designed knife plate is change-free within the rated specifications. Convenient change of specifications without the use of tools.
11. Fully stainless steel construction features maximum durability and convenient cleaning. Transparent upper lid provides clear visibility for packaging operations.
12. Forced insertion design provides high economy. Minimum film thickness is 0.035mm (35 microns).
