

## *SP-40II High Speed Granulator Packaging Machine*

### **The main performance:**

1. The machine adopts a rotary cutter, three sides, four sides or back seals. The packaging speed is fast and the packaging bag is beautiful.
2. Using step-driven structure to control the length of the bag, with photoelectric tracking and positioning, accurate movement, can automatically complete the bag, measuring, filling, sealing, cutting, counting and other functions.
3. It is suitable for packaging of particles, powders, liquids, etc. in food, medicine, chemical industry and other industries. Such as cereal,

Puffed food, sugar, medicines, tea, protein powder, coffee, seasonings and other items of measurement and packaging.

### **Performance parameters:**

Type	SP-40II
Packing speed	50-85 bag/min
Measuring range	7-40ml
Heater	110 V, 250 W×4
Total power consumption	1.4KW
Total weight	About 400kg
Dimensions	600mm×790mm×1780mm
