

## **DZ(Q)-600LG Chamber Type Vacuum Packing Machine**

This machine is specially designed for vacuum container with big wrapping bag (powder including liquid) of upright seal and the design is updated and practical. This machine is designed to be specially used for packaging of powder products and for vacuum packaging of powder and 3D packages. It operates in vertical position. Plastic bags containing the products can be put into the external package barrel or carton, which is then placed into the packaging machine for packing. This machine is also applicable to the liquids and soy sauce that cannot be poured during packaging.

### **Features:**

- Movable. The machine is easy to relocate to any place you want.
- Safe and easy to operate with Microcontroller operating system.
- Strong and transparent chamber door make the process controllable.
- Extremely suitable for powder type product vacuum packaging.

### **Chamber Type Packing:**

Chamber type vacuum packing machine is suitable for powder type product such as chemical battery powder. With aluminium plastic bag it can keep the light and heat out. Also with vacuum pack it reduces the effect of oxygen.

### **Technical Data:**

<b>Machine Model</b>	<b>DZ(Q)-600LG</b>
Voultage	380V / 50Hz
Power	2.0kW
Compress Air Requirement	0.5MPa-0.8MPa
Sealing Length	600mm (Customizable)
Sealing Width	10mm (Customizable)
Dimensions	1200×800×1380mm
Weight	250kg
