

Automatic Tea Bag Packing Machine XY-11

It is suitable for automatically packing dust tea products (filter bag), such as fragmental tea, medicinal tea, herb tea and so on. It is safe for the products and controlled by PLC. And different type has the different function.

Characteristics of the tea bag packing machine:

1. The machine is controlled by PLC and the intelligent temperate controller.
2. In order to make the tea bag very safe, all the cover and spear parts which contact with the raw material are made by stainless steel meeting to GMP standard.
3. Equiped with the special mechanical hand, which could keep the stability of working and ensure the packaging effect.
4. The bag size and filling range are adjustable, so the operation is very easy for the operator.
5. All the spare parts are stronger by the chemical treatment; the machine could continue work for more than 24 hours.
6. The sealing roller and inner spear parts are made by special chemical treatment, so the machinery will never rust, even in the wet and hot circumstance.
7. The tag and thread device is equipped, this can be optional by customer's request.

Technical data:

Allowable Bag Size	W 60 - 75mm L 55 - 70mm,
Tag Size	W 28mm L 23-28mm
Packing Capacity	30-60 Bags / Min.
Weighing Range	1-10 g
Bag Film	Filter Paper
Machinery Power	1.6 KW / 220V / 50Hz
Bag Type	3 Side Seal
Machine Dimension	L900*W950*H1800mm
Net Weight	400 kg
