

High Speed Automatic Packing Machine VL320

It (automatic packing machine) is a small type economical packing machine with good performance. It is suitable for a wide range of granular and powder products, not only for food but also non-food, such as beans, sugar, peanuts, frozen foods, milk powder, coffee, as well as nuts, screws, etc.

Application: granule, powder, and product in bar shape, bulk shape, ball shape, etc.;

Bag type: Pillow bag, Stripe sealing; (round hole /euro hole punch, reticulation sealing are for option devices)

Film material: PP、PE、PVC、PS、EVA、PET、PVDC+PVC、OPP+ laminated CPP, etc
Relevant equipments: Multi-head weigher, volumetric cup, auger filler, linear weigher, vibrating bowl, liquid pump, etc

Features:

1. Using triple servo controlling system, more stable operation, more accurate running, and more efficient
2. The whole machine adopts 3mm&5mm thick stainless steel sheet metal processing and assembly, making it more stable. And the packing speed is fast due to the core components by special optimization design.
3. Pulling and releasing belt by servo drive, make it more accurate.
4. It can be matched with combined scale, auger filler, volumetric cup and pump to achieve accurate and efficient measurement. (The above functions have been included in the standard program of packaging machine.)
5. The equipment accessories adopt electrical components with famous brand both domestic and international and ensure more stable and durable performance through years of market tests.
6. Its design conforms to GMP standard and has passed CE certification.

Machine Parameters:

Model	VL320
Packing speed	20-100 bags/minute
Film width	120-320mm
Film thickness	0.05—0.12mm
Bag size	L:50—190mm, W:50—150mm
Control system	PLC+ servo+ color touch screen
Power supply	1N+PE/50HZ/AC220V 4KW
Air consumption	0.6—0.8Mpa, 0.3—0.5m ³ /h
Dimension	L1350*W900*H1400mm
Machine structure	304 stainless steel
Weight	350kg
