

DPP-110L Automatic Ketchup Custom Blister Packaging Machine

This blister packaging machine is suitable for packing the liquid like chocolate, jam, butter, honey widely used in food industry.

Features:

1. It adopts photoelectrical controlling system to make PVC, PTP, be cut automatically to guarantee the Synchronous stability of over- length distance and multi stations.
2. This automatic ketchup packaging machine automatic finished PVC forming, Feeding, Heating sealing.
3. It can be optional equipped with photocell correction device.
4. Imported stepper motor traction and image-character register to optimize packing grade
5. All of working stations are adopted four columns for position. It is with stability performance and easy operation.
6. It equip with the Waste edge device, The waste is in good consistent and clean after cut. It's easy to clean.
7. Box body can be adjusted through swing type gear with level. It's easy to adjust and check; PVC film roller is built-in, it's sealing and dust-free.
8. The hot sealing station adopts underneath type air cylinder. The pressure is average and clean appearance and the indentation device is option.
9. Adapt 20L liquid barrel (heating or mixing function is optional).

Technical Parameter:

Model	DPP-110L Blister Packaging Machine
Punching frequency	10-35 Times/min.
Output	2400 Pcs/H
Max.forming area	70*110*26mm
Air supply	0.6-0.8Mpa
Total power	380V 50Hz 3.0Kw
Main motor power	0.75Kw
PTP	Thickness (0.02-0.035)*110mm
PVC sheet	Thickness (0.15-0.5) *Width110mm
Dialyzing paper	(50-100)g*110mm
Cooling mould	Running water,Circulation water
Overall dimension	1500*600*1200mm
Weight	450Kg
Noise	<75dBA
