

Edible Oil Filling Machine GF-series

This machine is mainly used in edible oil and condiments production line, using flowmeter and weighing type filling usually. It has the advantages of high precision, no drip and leakage, and high automation. This machine is suitable for all kinds of bottled edible oil, condiments product, etc with production capacity ranges from 2000BPH to 20000BPH based on 500ml volume.

Features:

1. This machine has a compact structure, perfect control system, easy to operate and highly automated.
2. Only by changing the star-wheel, arch board can realize fill bottle shape change.
3. The parts contact with product is made of quality SUS316/304, anti-corrosive, and easy to clean.
4. Rapid flow, highly filling precision, nicely liquid level without any liquid loss to satisfy the filling process demand.
5. The capping head adopts constant torque magnetic device to guarantee capping quality and impact cap.
6. This machine has a high efficient cap arranging system, perfect cap feeding with self-control and self-protection device.
7. The machine adopts perfect overload protective device can ensure the operator and machine safety.
8. The control system has many functions, such as control producing speed, cap shortage detection, bottle block automatic stop and production counting etc.
9. The main electric and air-drive components are world famous brand products.
10. All control is advanced touch-screen operation and realize people-computer dialogue operation.

Technical Parameters:

Type	GF12/5	GF20/5	GF32/6
Filling Heads	12	20	32
Capping Heads	5	5	6
Output (BPH)	3500	6000	10000
Dimension (mm)	1980*1760*2700	2200*2700*2700	2950*3000*2700
Power (KW)	1.5	1.5	3
