

Automatic Horizontal Candy Bar Packaging Machine LG-1000A

Our candy bar packaging machine is mainly used to pack candy, chocolate, cookies and other ordinary shapes. The machine has two feeding methods: automatic feeding and manual feeding.

Automatic feeding is the first choice for customers, because automatic feeding is convenient and fast, which can greatly save the company's manpower and time. Manual feeding is also optional. Manual feeding can make the packaging more clear and suitable for customized packaging.

The company can choose different feeding methods to connect with the original production line for different production purposes, so as to achieve the production purpose quickly.

Why Choose Our Automatic Candy Packaging Machine?

1. The simple structure adopted by the machine makes it more convenient and convenient to adjust and set up the machine. And when changing products of different sizes, cleaning the inner tank is very convenient.
2. Our purpose of multi-stage feeding can be realized. The machine is equipped with multi-stage feeding system, which can make the feeding process more clear.
3. Automatic candy packaging machine can realize the function of automatically controlling the position of materials, enabling products to enter the packaging machine in an orderly and orderly manner, so as to achieve accurate positioning, stable delivery and high-speed operation.
4. The machine is equipped with a crushing groove at the connection part and the bottom of the belt, which is convenient to maintain the machine equipment, saves the operator more time and energy, and effectively improves the production efficiency.
5. Candy bar packaging machine in the control system adopts the high quality electrical components, intelligent PLC, touch screen all in our machine configuration, good electrical components can make the operation more simple and more intuitive.

6. Candy bar packaging machine can support a variety of belt operation. For example, food grade blue antibacterial PU, anti-adhesive belt and white PU belt are all optional belt types.

Technical Data:

Model	LG-1000A
Voltage	380v
Power	3.5 kw
Packing Film Width	50-140 mm
Bag-making size	20-65 mm
Packing speed	1000 bags/min
Weight	500 kg
Size	4000*950*1500 mm
