

Dependable Performance Jelly Candy Depositing Line Durable Gummy Candy Machines - DR-JSF

The DRSF-J series Vacuum cooker and jelly candy depositing lines are the advanced equipment's for jelly candies with aluminum moulds. They are the best choice for producing carrageenan, gelatin solid and half solid candy.

Type: Jelly candy depositing machine is for making jelly candies. Combined with mechanical, electric and pneumatic.

Structure: Full machine driven by servo motors, controlled by 5 axels motion controller. We have one row of moulds, two rows of moulds, three rows of moulds and four rows of moulds jelly candy depositing machine. With tight construction and high automation.

Specification:

Production Capacity	150-600kg/h	Power Consumption	15-30kw
Steam Consumption	450kg/h	Weight of candy	3.5-15g
Steam pressure	0.4~0.8Mpa	Compressed air consumption	0.6m ³ /min
Temperature of workshop	20-25°C	Humidity of workshop	55%
Dimension(L*W*H)	35000*2300*3100mm	Weight	6000 kg
