

Hot Juice Filling Machine RCGF 18-18-6

RCGF series 3-1 juice Filling Machine is mainly used in the beverage filling process. The machine combines washing, filling and capping with complete automation, suitable for filling juice and tea beverage.

Features

- Full juice tea Hot Filling Machine avoids bottle distorted after cooling and reduces dissolved oxygen at the max.degree.
- Product storage hopper and feed system adopts reasonable product feed design(constant flow, constant pressure, no foaming).
- Product hopper with reasonable structure(exhaust, fully close, temperature can be detected).
- Medium and high speed line adopts product distributor instead of large liquid carousel, which can be cleaned completely by pressure cleaning with CIP.
- Sanitary filling valve system umbrella-flow type structure.
- Product recycle tank system with automatic product feed startup.

Technical Parameter

Model	RCGF 18-18-6
Washing workstation	18
Filling workstation	18
Capping workstation	6
Production capacity(500ml)(B/H)	5000
Bottle specification(mm)	$\Phi=50-95$, H=150-310
Motor power(KW)	4
Overall dimension(mm)	2550×1850×2200
Weight(kg)	3000
