

## *Bottle Filler Machine For Powder ZD-2*

When some powder materials are not suitable for bag packing, Bottle Filling Machine is a good choice. This machine can realize calculation and filling functions. The Automatic Filling Line is composed of filling machine, Labelling Machine and Screw Feeder System. It is suitable for coffee powder, wheat flour, condiments, solid beverages, veterinary drugs, glucose, medicines, powder additives, talcum powder, agricultural pesticides, dyes and other low-fluidity materials.

### **Features:**

1. This power bottle filling machine adopts microcomputer control and mixed step motor driven technology, work stable and reliable, with high repeat accuracy and low noise.
2. It can work separately or in line with bottle unscrambler, capping machine and labeling machine.
3. Stainless steel structure, the quick disconnecting hopper could be washed easily without tools.

### **Technical Parameter:**

<b>Model</b>	<b>ZD-2</b>
Voltage	220V 50HZ
Power	1100W
Capacity Of Hopper	25L
Filling Speed	1-25Bots/Min
Filling Range	10g-5000g
Suit Bottle Size	DIA:20-150mm H:60-300mm
Machine size	2000*900*2000mm
Net Weight	250KG
