

Automatic Pillow Packing Machine YC -100

Can be applied to: food (snack bar, bread, cookies, ice lolly cake, chocolate) Plastic (cutlery, tray) hardware, Soap, sponge, tissue, card etc.

Main feature and structure characteristics

- Stainless steel machine body, elegant appearance and durable
- The bag length without human setting, can be automatically detected during machine operation and set automatically
- Simple machine structure of servo motor, easy maintain, less wear and long lifetime
- The main control circuit adopt single machine control, display on the touch screen, servo motor control, superior human interface, easy operation, and clear at a glance.
- Packing speed and the length of forming bag can be controlled by servo motor, stepless speed, widen the adjustment range, can well match to the front part processing line.
- High sensitivity photocell tracked accurately automatically.
- Independent Sealing temperature control, suitable for many packing material, firm and elegant sealing.
- Can equip with Intermittent Pneumatic Devices and spraying alcohol device.

Technical Parameters:

Model	YC -100
Packing speed	30-200 bags/min
Bag length	L :70-260MM W:30-90MM H:3-35MM
Film width	80-220mm
Packing material	OPP/CPP ,PT/TE,KOP/CPP ,ALU-FOL
Outer size	L 4100*W 100 0*H1500MM
Heating power	3.5kw
Power	0.55+0.75kw
Total power	4.84kw
Machine weight	550kg
Optical device	ribbon printer, flushing device, bread falling feeder, stacking machine, guide bar, hair removing, and gusset device
