

Screw Conveyor TH-SC-114/133/165/220/273

Screw conveyor is consisted of a screw, conveying pipe, drive motor, square feeding hopper, support frame and control panel. This machine material is stainless steel, which is anticorrosive and food grade. It can help convey powder or tiny granule materials from one place to reset position.

Application

It can be widely applied in food, chemical, building materials industries. Such as flour, milk powder, coffee powder, adhesive mortar, lime powder, etc.

Characteristics

- Stainless steel 201/304/316L for option, easy to clean and replace conveying materials.
- Compact machine structure, save area and high efficiency.
- High speed working performance, 3-20t/h working capacity and can be customized.
- Screw auger size can be different for different working performance.
- Easy to move anywhere as to equipped universal wheel.

Parameters:

Model	TH-SC-114	TH-SC-133	TH-SC-165	TH-SC-220	TH-SC-273
Power supply (KW)	1.5	3	3	4	4
Machine weight(Kg)	140	260	320	460	520
Conveyor tube diameter	114mm	133mm	165mm	220mm	273mm
Conveying capacity	3t-5t/h	4t-6t/h	5t-12t/h	8t-20t/h	10t-30t/h
Machine material	Stainless steel 201/304/316L/Carbon steel for option				
Screw auger material					
Lifting height	Customized for your practical
